The Finest Indie Since 2011

Wylie Cable

Founder

www.domeofdoom.org

Dome of Doom Records (DOD) started out as a DIY cassette label birthed out of the punk scene in San Francisco and the legendary Los Angeles club night, Low End Theory in the early 2000s. Selling tapes of underground artists spanning plethoras of genres, DOD has built an archive suitable for films, commercials, video games, museum installations and beyond.

Our songs have walked the runway at Paris Fashion Week, they’ve soundtracked the first season of HBO shows, and traversed the athletic market from GoPro to Adidas.

Join the revolution.

A DIY Concept.

AN INDIE THAT DOESN'T QUIT

Over the last decade, the Dome of Doom catalog has received over 60 million streams across DSPs, including notable platforms such as Spotify, Apple Music, TIDAL, SoundCloud, Bandcamp, and YouTube. Cassette sales have topped 40,000 copies and vinyl runs have surpassed 5,000 units. Avid supporters of the label's artist roster are found all over the globe, including the continental US, Canada, South America, Mexico, the United Kingdom, Japan, Australia, Russia, Korea, and dozens of countries in Europe. The digital landscape of Dome of Doom's catalog is distributed worldwide by Alpha Pup - a Los Angeles based family-owned independent distributor founded by Grammy Award winning engineer and producer Kevin Moo.

About us.

INDIE meets the MAINSTREAM.

Agnostic to rigid genre classifications, DOD is devoutly reverential to beats and musicians that refuse to acknowledge the existence of any sonic limitations. Beat scene veterans meet rising newcomers, Angeleno producers collaborate across state lines and intercontinental oceans — their roster is

unimpeachable and always ahead of the curve. DOD has succeeded for over a decade for all of these reasons because it abides by the wisdom of the late Ras G--

"It ain't about what your background or your race is — it's about what the fuck you sound like, and is that shit bumpin'."

HUF Footwear

Elusive introduces The Clive from HUF Footwear

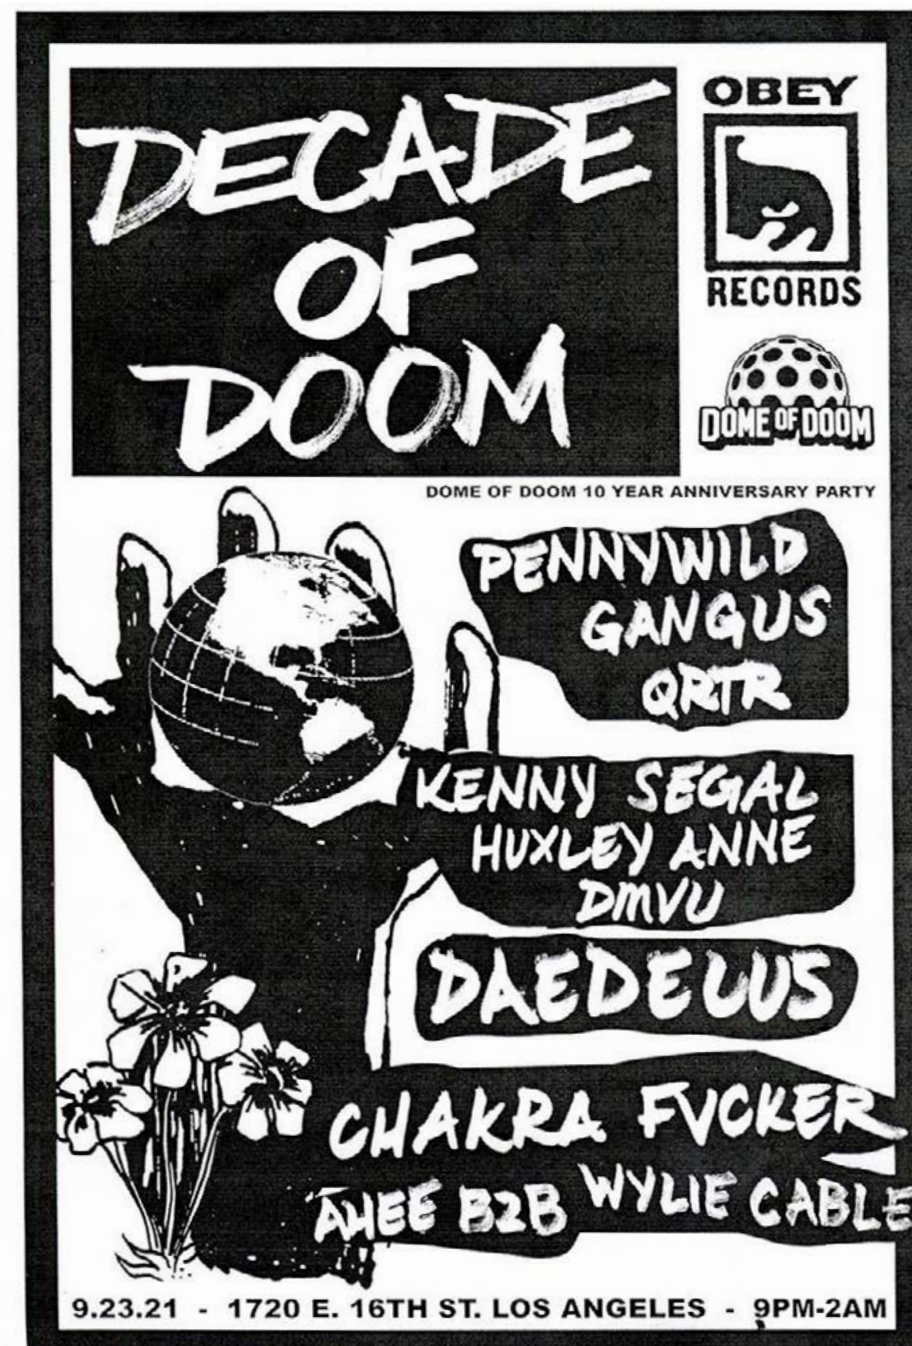

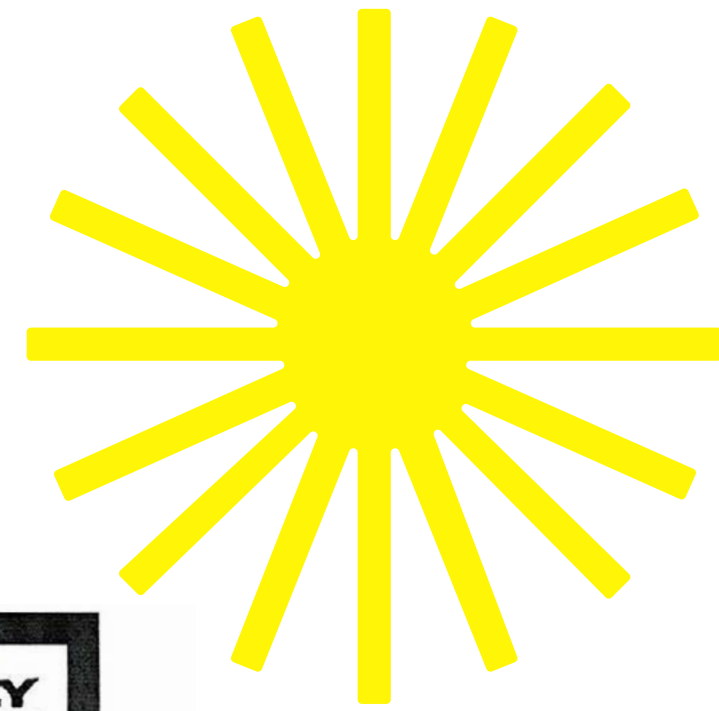

Go Pro

Gnome Beats' beats define the HERO7 Black

Arcadeggedon

Saka's music was licensed for video game cutscenes in game music

Creative.

DOD partnered with Shepard Fairey's OBEY brand for a custom merch line and live event to celebrate the label's ten year anniversary.

Activations.

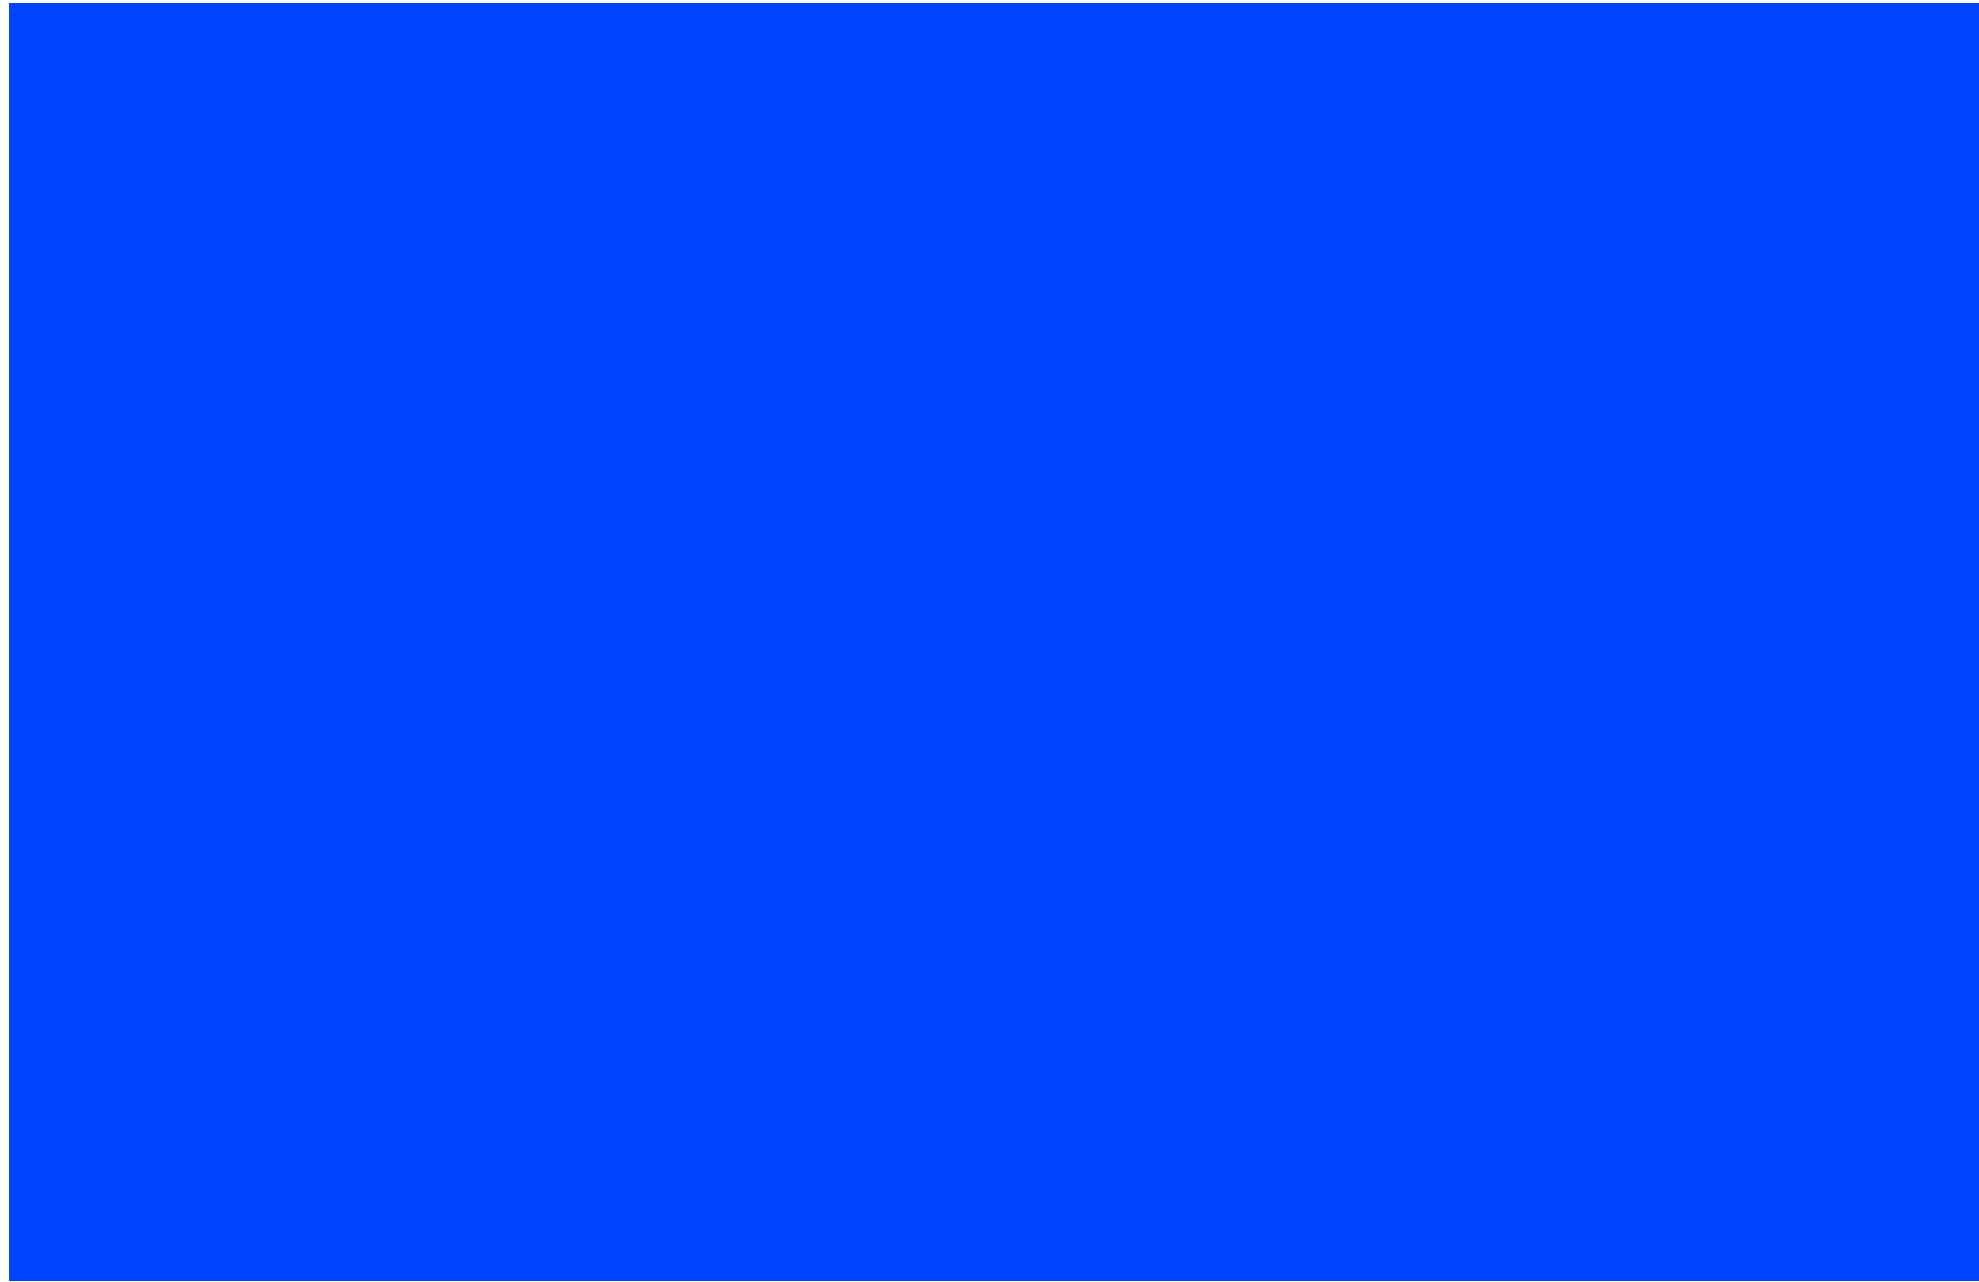

The anniversary activation built on previous collaborations between the label and brand - selling out both merchandise and tickets.

From scoring a club scene in a blockbuster movie to accompanying a live multimedia installation in Amsterdam, we have a sound that fits whatever unique moment you require.

Your Vision.

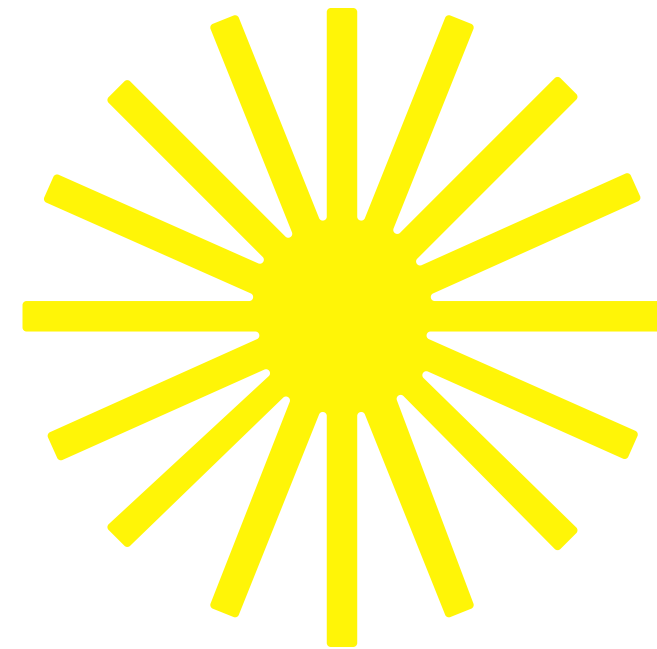

As a lifelong musician and artist, I have always noticed how music makes up the emotional landscape of every cinematic experience I have ever had. It has become a great pleasure and honor to help orchestrate these moments of artistic brevity in the modern media landscape.

Our Sound.

01-15-
2023

Thank you.
